- Discussion
 - Findings & Implications
- Conclusion

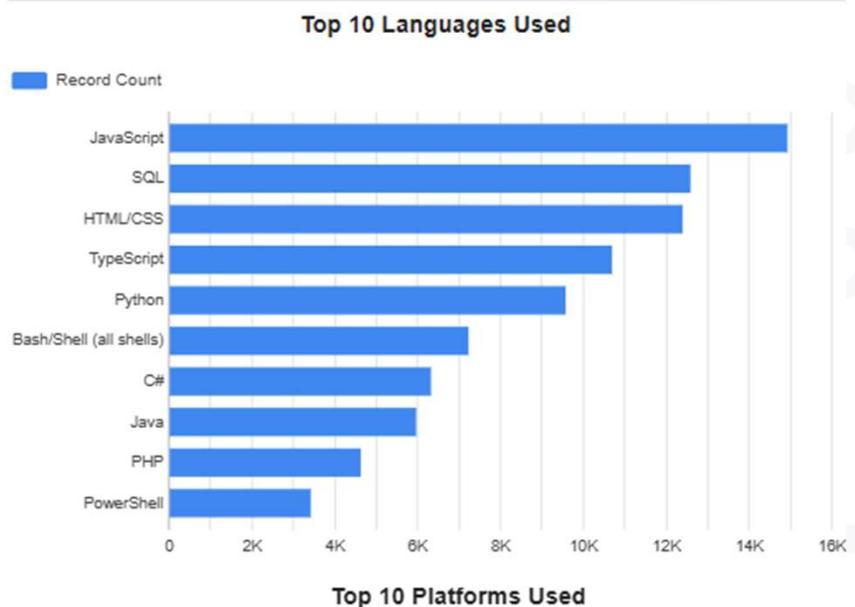

EXECUTIVE SUMMARY

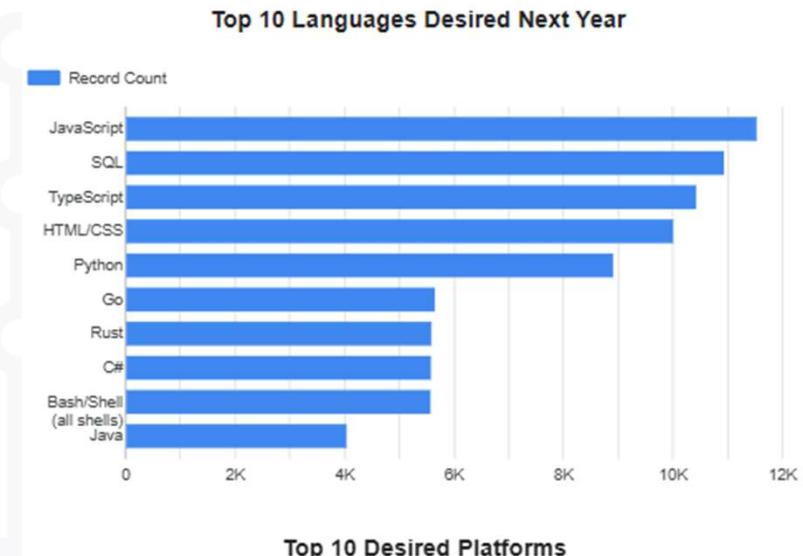

- Popular Programming Languages
- Popular Databases
- Popular Webframes
- Demographics
- What can we draw from our findings?

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

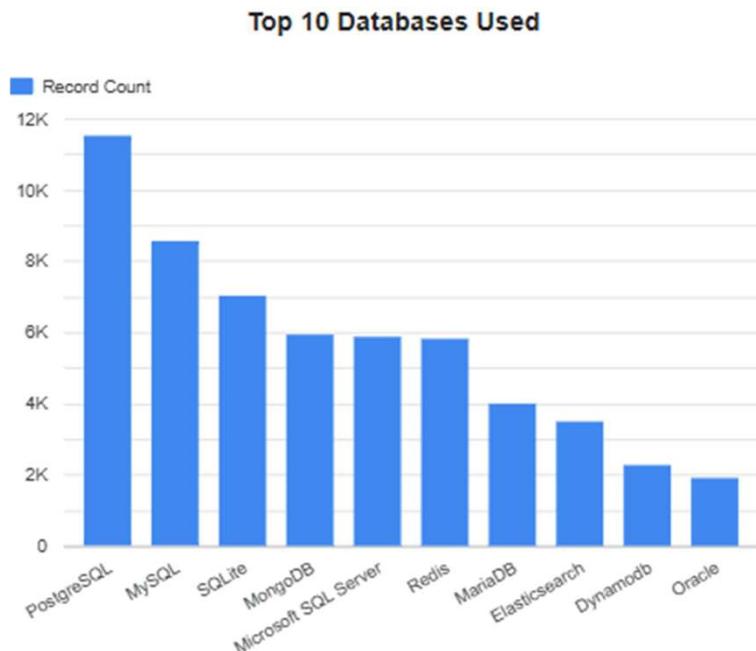

- There was less interest in next year's top programming languages
- JavaScript was the top language for the current and next year
- SQL had nearly the same interest for the current and next year

Implications

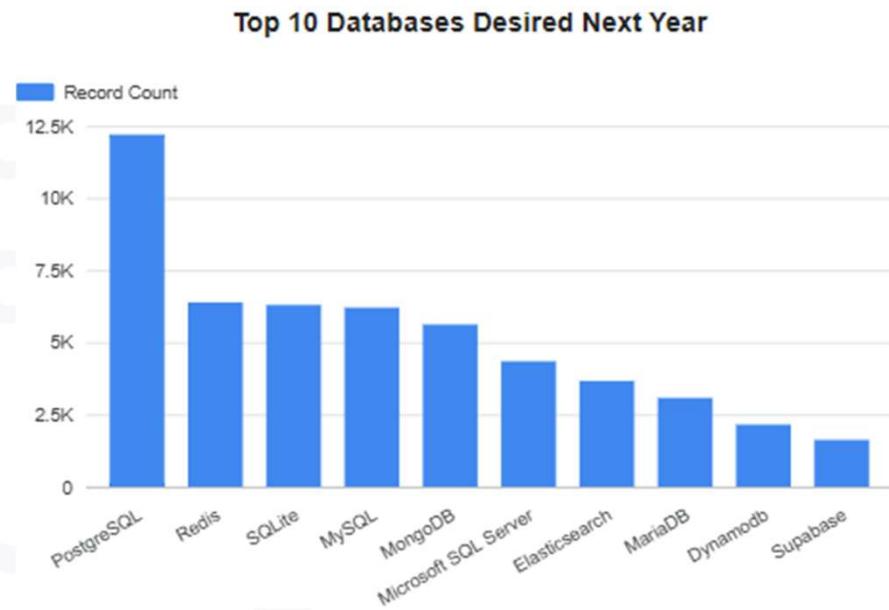

- Less people are interested in thinking about the next year than the current year
 - JavaScript is a very popular language
 - SQL is a consistently popular language that isn't going away

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- PostgreSQL far surpasses others in numbered counts
- MySQL fell far behind from the current to the next year
- Oracle fell off next year's list

Implications

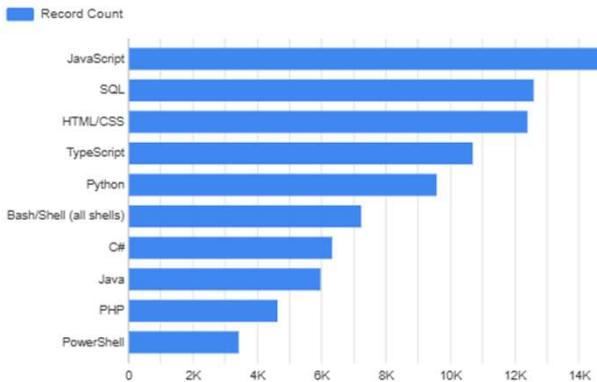

- PostgreSQL is clearly the most desired and widely used database
- MySQL must have limitations that lead users to not preferring it as a database
- Oracle is either outdated or not versatile enough to hold its own in terms of popularity

DASHBOARD

DISCUSSION

- What did we take away from the data?

OVERALL FINDINGS & IMPLICATIONS

Findings

- AWS is the clear winner of platforms used
- Those with Bachelor's degrees, ages 25-34 from the United States make up the majority of respondent demographics
- JavaScript and PostgreSQL are the most popular for languages and databases, respectively

Implications

- AWS offers the most useful tools and versatility to perform day to day tasks
- This demographic were either targeted or had the most self-interest in responding to this survey
- JavaScript and PostgreSQL offer the most useful tools and versatility to perform necessary tasks

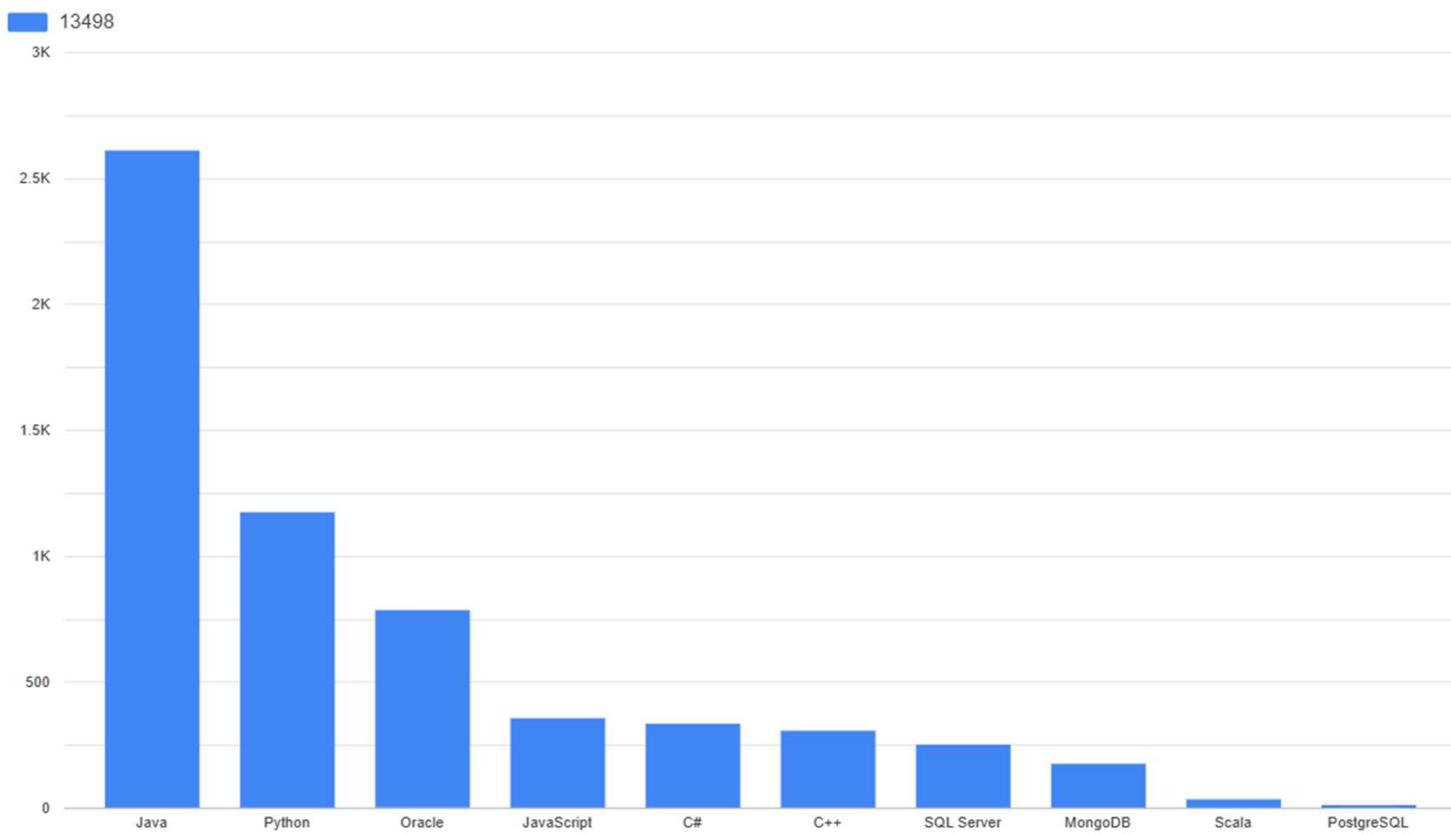

CONCLUSION

- JavaScript is the leading language people both use and want to continue using
- PostgreSQL is the top database the majority uses and wishes to continue working with
- AWS is the best and most versatile platform for people to perform their work with
- Those from the United States, Ages 25-34 with Bachelor's Degrees were the top respondent demographic for this survey
